CAUTIONS: If no significant clinical improvement is noted in 5 days, the diagnosis and treatment should be re-evaluated. Discontinue medication if signs of gastrointestinal upset, jaundice or blood dyscrasia appear. When inflammatory conditions are caused by micro-organisms, adequate therapy should be given simultaneously with phenylbutazone.

CONTRAINDICATIONS: This treatment is contraindicated in horses with cardiac, renal or hepatic insufficiency and in cases with signs or history of anemia or other haemocytological disorders. The use of this product or any other NSAID is contraindicated in horses with pre-existing gastrointestinal ulcers or if bleeding is suspected. Do not administer concurrently with corticosteroids or other NSAIDs. Do not administer to dehydrated animals.

ADVERSE REACTIONS: Oral and gastrointestinal erosions and ulcers, hypoalbuminemia, diarrhea, anorexia, renal effects (azotemia, renal papillary necrosis, sodium and water retention), and blood dyscrasias have been reported with the use of phenylbutazone.

STORAGE: Store between 15°C and 25°C. Protect from moisture.

PRÉCAUTIONS: Si aucune amélioration clinique significative n'est observée après 5 jours de traitement, le diagnostic et le traitement devraient être reconsidérés. Cesser le traitement si des signes de
